MATERIAL NAME	GRADE
High Precision	PC25H / PC20H
General	PC25G
Casting	PC 15C

PC15C is optimized for good for General wear resistance, toughness and performed good for CAST IRON Machining. It is good for free cutting of Casting with excellent Result.

PC25G is high hardness and excellent versatility with good free cutting material for roughing and well as for finishing. This Grade is having excellent result for smooth machining.

PC20H is Excellent Grade Suitable for all material. It has excellent Results for all type machining Application for Roughing & Finishing for Cast iron, Steel & stainless steel.

PC25H is the Premium Grade Suitable for all kind material. It have good versatility & preferred in interrupted as well as free cutting Machine Component for for all kind of material like Cast Iron, Steel FORGING, as well stainless steel for EXCELLENT Result Machining. This is a All rounder Grade of PACE.

MILLING CUTTER

Two - side spiral blade 90 degree shoulder facing end mill It is suitable for all kinds of plane , slotting machining Is in best efficiency and precision.

Two Side Swallow Tail Solid Cutter Insert PNX1706 two-side insert, every one with 4 blades

TWO TYPE OF INSERT FOR ONE CUTTER

TWO FACE SPIRAL BLADE 45 DEGREE FACE MILLING CUTTER

It is suitable for all kinds of plane process, and it is used for many places.
 And we provide goods in high quality at good price.
 It can clamp two kind of inserts to the same retaining nest.
 The inserts are the two-side square ones with 8 cutting edge!
 and the two-side octagonal ones with 16 cutting edges.

MAIN CHARACTERS

- ✓ Orthogonal screw clamp could ensure better clamp rigidity and safety.
- ✓ Thick tooth design makes much higher efficiency.
- ✓ Square inserts could cut 5mm in depth at most, and the orthogonal ones 3mm.
- ✓ One cutter with two kinds of inserts is suitable for roughing, semi-finishing and finishing.
- ✓ It is very economical, with 8 cutting edges and 16 cutting edges.
- ✓ It has repairing light blade inserts, and could lead to high quality.
- ✓ The diameter of cutter is from 50mm to 315mm, and it could cover the whole plane.
